

# Portable Ceramic Membrane Filtration System

The Hilco Ceramic Membrane Filtration System is an ideal way to safely dispose of your oily-water waste streams. Depending on stream composition, disposal volumes can be reduced as much as 90%.

The system is designed to accept three different retention-rated ceramic membranes (0.2  $\mu\text{m}$ , 0.01  $\mu\text{m}$ , and 0.005  $\mu\text{m}$ ), depending on local discharge ordinances.

Systems can be custom-designed for maximum operating efficiency based on your weekly generating volumes.

## Features and Benefits

- Compact Design
- Light Weight
- Broad pH operating range of 2-14
- Uses Standard 115 VAC Electrical Receptacle
- Maximum Operating Temperature of 200° F

## Applications

- Machine Tool Coolant
- Aqueous Washer Fluids
- Mop Water
- Compressor Condensate
- Wash Water
